## Biography

LUMIO (name of a Corsican village meaning village of light) is one of those rare musical projects – out of time and fashion – that, barely listened to, already seem essential to us. Bright and distinctive among the current production. A project. A vision. A swan song that becomes the tree of possibilities, like so many intimate slices of life through which LUMIO tries to challenge with its philosophical pop.

Behind this project, Niko Gamet\*, an inhabited artist, who is well-versed in English pop and American folk. Reminiscences Beatles, beach boys, a psychedelic rock energy of Grizzly Bear with folk accents of a Fink, Bon Iver tinged with indie cold wave where Peter Gabriel could rub shoulders with the intimate of a James Blake and the sensitivity of an Emiliana Torrini.
